

Want a 2nd Chance?

It's not often that you get a 2nd chance when making a big decision like buying a new computer. Companies are offering rock bottom pricing on new systems and you may think you've gotten a great deal now, but it'll only be a matter of time before you start having issues with your new machine.

Have you experienced any of the following common problems?
The majority occur within the first three months of ownership!

<i>Pop-ups</i>	<i>Error messages</i>	<i>Frequent, random crashes</i>	<i>Slow start-up</i>
<i>Unwanted icons cluttering your screen</i>	<i>Expired trial software</i>	<i>Dozens of icons in the lower right corner</i>	<i>Slow overall performance</i>

These problems are caused by computer companies being paid by outside vendors to load their software on your machine at the factory. Most of it is useless junk that is taking up valuable resources inside your computer. But what do you do? Many of the programs and files have cryptic names making you unsure of the importance of the software. Other times you may find that removal of the program just causes more error messages to pop up. What you need is a 2nd chance at a fresh start and that's where Liberteks.com can help.

Liberteks.com BEST PRACTICES		
Remove Adware & Spyware	Remove unused/unwanted programs	Install a quality anti-virus program
Remove expired trial software	Update Windows	Update other programs only if necessary
Install and teach you how to use tools to keep your machine running at it's best		Re-install the desktop and customize it for you

Bring this flyer in for \$25 off of a Best Practices Installation and turn your system into a Best Build!
